-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 19, 21, drawn to the means to protect the thorax of the patient, classified in class 601, subclass 41.
  - II. Claims 27, 31, 32, 33, drawn to a chest compression device having arms, classified in class 601, subclass 41.
  - III. Claim 40, drawn to a control assembly, classified in class 601, subclass 41.
  - IV. Claims 49-57, 59, 60, drawn to an electronic display, classified in class 601, subclass 41.
  - V. Claim 63, drawn to a manual chest compression device having a palm grip, classified in class 601, subclass 41.
  - VI. Claim 90, drawn to an abdominal binder, classified in class 601, subclass 41.
  - VII. Claims 93-96, drawn to a method of administering CPR using an actuator, classified in class 601, subclass 41.
  - VIII. Claim 97, drawn to a method of administering CPR using a manual compression device, classified in class 601, subclass 41.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I-VI are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention each invention has separate utility such as a CPR

device that has means to protect the thorax of the patient without the details of a compression device having arms or the control assembly or the electronic display or the manual compression device or with an abdominal binder. See MPEP § 806.05(d).

3. Inventions I-VI and VII-VIII are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the method of administering CPR doesn't require the details of the structure recited including the control assembly.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Danton DeMille whose telephone number is (571) 272-4974. The examiner can normally be reached on M-Th from 8:30 to 6:00. The examiner can also be reached on alternate Fridays.

6. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Greg Huson, can be reached on (571) 272-4887. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
